## PRODUCT UPDATE FOR MTM5000 SERIES TETRA MOBILE

### OVERVIEW

The **MTM5000 Series TETRA Mobile** (MTM5400, MTM5500, MTM800FuG and MTM800FuG ET) in **UHF band** (380 – 430MHz) will undergo a refresh to design out end of life components. Therefore, this update advises of the replacement of the legacy MTM5000 TETRA Mobile Series models.

For Germany, this only applies for the general distribution of the affected radios via the Motorola Solutions Partner Empower Program.

The new replacement Mobile Radios will remain as MTM5400, MTM5500, MTM800FuG and MTM800FuG ET. The new Sales Models and options will be rolled out in May/June 2020.

Please note:

- There will be no change to the product form factor or performance
- The new sales model will have higher RAM – 128MB RAM (current 64MB RAM) and 2GB NAND FLASH (current 1GB NAND Flash) to allow future functionality updates
- The new sales model will ship with the MR19.2 software release. Due to software compatibility, downgrade to releases prior to MR19.2 is not supported
- Due to lack of market demand, TETRA Enhanced Data Service (TEDS) is not supported on the refresh models
- Accessories compatible with the old transceivers will be compatible with new transceivers

### PRODUCTS AFFECTED

CANCELLED MODEL NUMBER	DESCRIPTION	REPLACEMENT MODEL NUMBER	DESCRIPTION
M83PFS6TZ5AN	MTM5400 380-430MHZ DASH MT953C	MDM85PFS6TZ5AN	MTM5400 UHF DASH MTR953C
